

FAX LETTER

10/15/2006

FROM: Perry Ellis, Mashpee, Massachusetts

TO: Ted Theis, TEDLAR NanoTech Labs

Dear Mr. Theis;

As you requested, I applied a single application of your NANOTECH WOW! Polish to a small area of a plastic "NO WAKE" marker buoy prior to placing it for the Summer season in the New Seabury Area of Popponesset Bay. It was in the water, in an area notorious for barnacle growth, from May through September. The entire buoy was covered with 1" to 2" barnacles, except where WOW! had been applied. I've never seen anything that could completely prevent barnacles from growing like this.

The potential of your polish in savings to the marine and boating industries is huge!

Yours truly,

Perry Ellis, Harbor Master
Mashpee, Massachusetts
