Dear Mr. Theis:

Your WOW! is worthy of its name! We are using it in our silk screen production area to lubricate the pivots on our automatic multicolor silk screen presses. It is dry, so we don't worry about "oil drips" on our fabric work. It saves us a lot of time and money as a release agent for the spray adhesive we use to hold tee shirts in place as we print them. We also use it to "polish" our machinery, its static resistance and extremely smooth finish keeps the machines virtually dust, dirt and lint free in a very high lint environment.

I'm recommending WOW! to everyone I know.

Thank you.

Yours truly,

**Lance Lambros
