October 16, 2006

Dear Mr. Theis;

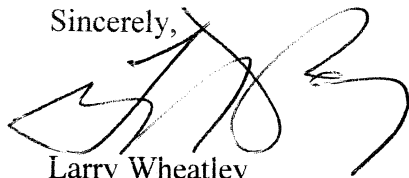

Your Nanotech Polish is terrific! I was amazed at how it prohibited barnacle growth where I applied it on my boat bottom. Being retired from the Coast Guard, I was skeptical. I've seen many products over the years, from paints to waxes and polishes, claiming to stop bottom fouling, but none has ever performed like yours.

I moor my 23' Sea Ray on Cape Cod, Massachusetts in Cotuit Bay, a harbor that has a slow tidal flow, and is very conducive to barnacle growth. In years past, by mid summer the barnacles were so bad they caused steering problems, and tremendous drag under power. Now all those problems are gone. I can enjoy my time on the water more, and not have to pull the boat mid season to clean it.

I also used Nanotech to polish my 2004 Lincoln Navigator, and have never had such a slick, shiny finish last so long. It even works on the dash board, tires and wheels. With it on the windshield, the water flows off, I use the wipers less, and they don't drag and chatter across the window as they had before.

You are welcome to use this letter to show others, and I certainly am going to recommend it to all my friends.

Sincerely,

Larry Wheatley
Lieutenant Commander., U.S. Coast Guard, Retired
