

Dear Ted,

Your NANOTECH *WOW!* Polish cured a big problem for my son, Todd.

He has been playing paint ball for several years. There has always been the frustration of having to get out of the game, while court rental time is running, to clear jams in the barrel when paint balls break before leaving the barrel. It's a mess, and takes a long time to get the gun ready to go again. He used *WOW!* to clean and lubricate his barrel and hasn't had a jam since! He cleans it as before, then uses your polish to swab the barrel, rather than the oil he used to use before. He plays quite often, and it has been several months since he has lost any court time to a jam.

Thank you for *WOW!* I recommend it for any dry lube or polishing job.

Best regards,
